

Plexus Lean™

Fuel up. Lean up.

Plexus Lean is a new, better-for-you choice that changes the meal replacement game. It's complete with nutrition from 24 essential vitamins, and minerals plus added health benefits (like energy, weight loss[^], and 20 grams of protein to support muscles) and a 100% vegetarian formula with an incredible taste.

Good Food Is Hard To Find

We don't always have time to sit down to a well-balanced meal, or even prepare a healthy snack, but when we look for alternatives that are more convenient, we're quickly disappointed. Fast food and prepackaged meals are often packed with unhealthy ingredients. The vast majority of meal replacement options are severely lacking in taste and texture (can you say "liquid chalk?"). Isn't it time for a meal replacement that's filling enough to be a complete meal, delicious enough to be a satisfying snack, and nutritious enough to help you lose weight or maintain your healthy lifestyle?

Plexus Lean

Introducing Plexus Lean, the supercharged, 100% vegetarian meal replacement option that delivers nutrition, weight loss benefits[^], and energy—all with a smooth, delicious taste.

Plexus Lean is power packed with 20 grams of plant-based protein from a pea, rice, and ancient grain blend. Add to that 24 essential vitamins and minerals, along with ALA (a plant-based omega-3 fatty acid), and 2 grams of naturally occurring and added leucine for muscle support, and you have all the nutrition of a healthy meal in a convenient, easy to prepare shake.

Plus, Plexus Lean is specifically formulated to be good for your gut, with 7g of dietary fiber per serving including FOS, a-GOS and XOS prebiotic fibers that promote the growth of good gut microbes.

With plenty of protein and fiber to help you feel satisfied, Plexus Lean can help you reach your weight loss goals.[^] And with a delectably smooth texture and a rich, chocolate mocha flavor, it's about to become your new favorite meal, snack, or anytime treat.

What's Inside?

To create a better meal replacement shake, we knew we'd have to include ingredients that were healthy, bioavailable, and high quality.

Here's what made the cut:

- 20 grams of ultra-pure, plant-based, non-GMO protein from pea, rice, and six ancient grains (sacha inchi, amaranth, quinoa, buckwheat, millet, chia)
- 7 grams of dietary fiber, including prebiotic fiber to support digestive health
- 2 g of leucine for muscle support (added and naturally occurring from protein)
- Digestive enzymes
- Highly bioactive 5-MTHF folate
- Highly bioavailable forms of other vitamins like B-Vitamins, Calcium, Potassium, Vitamins A, D and E, Zinc and more
- Alpha Linolenic Acid (ALA), a plant-based Omega-3 fatty acid

What's Not?

We also wanted to leave out the questionable "stuff" that's usually found in protein powders.

That's why Plexus Lean is:

- 100% Vegetarian
- Free from common allergens: soy, gluten, and dairy
- Non-GMO
- Free of artificial flavors, artificial colors and artificial sweeteners
- Free of preservatives, cholesterol, carrageenan, and magnesium stearate

Advanced Bioavailability

Most protein shakes are just that – protein with not much else. Sometimes they sprinkle in a few vitamins and minerals to spruce up their labels but even then, those nutrients are often in cheap forms that the body has a hard time absorbing, meaning they go to waste. Plexus Lean™ uses forms of key nutrients—including 5-MTHF folate—that are designed to be more bioavailable than standard vitamins, so they're easily assimilated and can deliver maximum benefit to the body.

A Healthy Gut With Every Glass

Plexus Lean contains seven grams of dietary fiber including a unique blend of prebiotic fibers from FOS (fructo-oligosaccharide), a-GOS (alpha-galactooligosaccharide) and XOS (xylooligosaccharide) that support digestion and microbiome health. Prebiotics work to selectively feed beneficial microbes in your gut microbiome. It's gut health, in a glass.

Lean's Primary Benefits

- Delivers a nutritious, filling meal in the form of a delicious shake
- Supports weight loss[^]
- Satisfies and controls hunger with protein and fiber
- Provides energy for an active lifestyle
- Supports digestive system health with 7g of dietary fiber including prebiotic fibers
- Supports muscles with 2g of leucine per serving (added and naturally occurring from protein)
- Provides 20g of plant protein to support muscle in combination with exercise

The Lean Advantage

- Amazing taste (chocolate mocha flavor)
- Fine-milled pea protein creates an incredibly smooth texture
- 100% vegetarian formula

Who should use this product?

Plexus Lean is the meal replacement solution that delivers optimal nutrition and weight loss[^] benefits all in a 100% vegetarian formula with an incredible taste. It's perfect for anyone looking for a healthy and convenient meal replacement or satisfying snack. Lean is not designed for use in children.

The Importance of Protein for Vegetarians

For those following a vegetarian diet, even part of the time, consuming enough protein to retain muscle mass can be a challenge. Many vegetarian proteins do not provide the full complement of essential amino acids. Plexus Lean provides a unique blend of proteins from various sources that, when combined, provide all of the essential amino acids your body needs. Plus, Lean provides 2g of leucine per serving. Leucine is an essential amino acid that provides muscle support.

Frequently Asked Questions

What is Plexus Lean™?

Plexus Lean is a complete meal replacement that contains 20 grams of luxuriously rich and smooth pea and rice protein, highly bioavailable vitamins and minerals, prebiotic fiber and leucine all in a 100% vegetarian formula free from GMOs and common allergens including soy, gluten, and dairy.

When is the best time to take Plexus Lean?

Anytime! Plexus Lean is the easy, tasty way to control hunger and sustain energy to help you power through your day. Plexus Lean is perfect for a satisfying meal on the go or a tempting between-meal snack.

Use Plexus Lean as a meal replacement twice a day for weight loss[^], once a day for maintenance, or whenever as a delectably-delicious snack.

Many people like to have a serving of Plexus Lean as their breakfast since it is quick and convenient. Two scoops in a shaker bottle with some water or milk of your choice makes for a perfectly satisfying morning commute. You can also try Plexus Lean as an afternoon snack to ward off the dreaded 'crash' between lunch and dinner. Packed with protein and fiber, Plexus Lean helps you feel satisfied and energized.

To help you incorporate Lean into your daily routine, we have created two seven day meal plans; one for weight loss[^] and one for maintenance. The meal plans utilize Lean as a meal replacement once or twice per day, and provide healthy recipes to use for your remaining meals and snacks. You can find the meal plans on the Lean product page or in the Virtual Office.

How do I mix Plexus Lean?

A shaker bottle is probably the easiest method. Just add two level scoops with water and shake vigorously for ten seconds. But if you prefer to add ice and fruit, you can also use a blender.

How much water should I use with Plexus Lean?

Blend or stir 2 level scoops (60 g) with 10-12 oz. of cold water or for a lighter option, blend or stir 1 scoop (30 g) with 4-6 oz. of cold water.

Should Plexus Lean be added to hot or cold water?

Lean is meant to be a refreshing meal replacement and it's best added to cold water.

Do I have to add water to Plexus Lean or can I add another beverage?

Feel free to substitute your plant milk of choice for water with Plexus Lean. Please note that this will affect your caloric intake. Dairy milk would also be compatible for lacto-ovo vegetarians.

How many servings of Plexus Lean can I take per day?

Use Plexus Lean as a meal replacement twice a day for weight loss[^], once a day for maintenance, or whenever as a delectably-delicious snack.

See our weight loss[^] and maintenance meal plans on the Lean product page or in the Virtual Office for suggestions on how to incorporate Lean into your daily routine as well as for healthy recipe ideas.

What protein is used for Plexus Lean?

We use ultra-pure, non-GMO pea, rice, and ancient grain protein (sacha inchi, amaranth, quinoa, buckwheat, millet, chia).

How does Plexus Lean help support muscle?

Protein is essential for building strong muscle and Plexus Lean provides 20 grams of plant-based protein, not to mention 2g of leucine per serving for additional muscle support.

What is the Prebiotic and Protease Enzyme blend in Plexus Lean and how is it beneficial to me?

The Prebiotic and Protease Enzyme blend in Plexus Lean is a combination of short-chain fructooligosaccharides (FOS), alpha-galactooligosaccharides (a-GOS), xylooligosaccharides (XOS) and enzymes from *Bacillus subtilis* and *Ananas comosus* which were carefully selected based on their widely studied benefits.

What is a prebiotic? How does it work?

Your gut is full of microbes. Some of them are good; some of them are bad. Prebiotics are non-digestible soluble fibers that make their way through our digestive system and help feed good microbes. These fibers like fructooligosaccharides (FOS), and inulin, can be found naturally occurring in whole grains, chicory root, onions, leeks, fruits and legumes. Prebiotics act as a fertilizer, selectively feeding good microbes in the gut and assisting in their growth.

Are there vitamins or minerals in Plexus Lean?

There are 24 highly bioavailable vitamins and minerals including 5-MTHF methylated folate, Calcium, Zinc, Vitamins A, C, E and more!

Frequently Asked Questions

Will I experience any side effects when I start taking Plexus Lean™?

Experiencing side effects with Plexus Lean is unusual. However, certain people who are not used to products rich in protein or fiber may experience temporary gas and bloating. One way to avoid this is to start with a smaller amount – like one scoop per day – and then gradually increase your intake over 1 to 3 weeks. Your body should adjust to the additional fiber and protein over time.

Can Plexus Lean help me lose weight?

When combined with a healthy diet and regular exercise, Plexus Lean is a great addition to a weight-loss plan.[^] If you are trying to lose weight[^], it is recommended to replace two meals per day with Plexus Lean. It is packed with satisfying protein and fiber so you are less tempted to make impulsive, unhealthy food choices. Plexus has provided a sample seven-day meal plan for you to try which is available on the product page. The meal plan is a guide for choosing healthier, lower-calorie meals while incorporating Plexus Lean to support your weight loss goals.[^]

Why is Lean 230 calories?

Plexus Lean provides a convenient option for a meal replacement that can, by itself, replace up to two of your daily meals. It is a nutrient-dense formula that contains enough vegetarian, high quality protein to help support strong muscles. Plexus Lean has the right amount of calories to provide you the energy to make it through your busy, active day and keep you satisfied until your next meal.

If I'm not trying to lose weight, will I still benefit from taking Plexus Lean?

Absolutely! Even if you are not looking to lose weight, Plexus Lean delivers protein that helps support muscle, vitamins and minerals necessary for a healthy lifestyle, and a prebiotic fiber blend. Plus, it tastes great, mixes quickly, and is portable so it fits into your active lifestyle.

What's the advantage of bioavailable ingredients?

The vitamins and minerals found in Plexus Lean are in very bioavailable forms so they are more easily absorbed and better utilized by the body.

Why does Lean include 5-MTHF instead of Folic Acid?

Up to 39% of the population cannot utilize absorbed Folic Acid. Plexus Lean is formulated with the most bioactive form that everyone can utilize. Folic Acid is a form of vitamin B9.

Is Plexus Lean safe?

Yes, Plexus Lean is safe. It contains no stimulants, artificial flavors, colors or preservatives, and is free from common allergens like soy, dairy and gluten.

Is it safe to take Plexus Lean while pregnant or breastfeeding?

If you are pregnant or nursing you should consult your physician prior to beginning any new supplementation, diet or exercise program.

Can Plexus Lean be used by children under the age of 18?

Plexus Lean is not recommended for use by children under 18 because the product was formulated to meet the nutritional needs of adults.

What flavor is the Plexus Lean?

Plexus Lean is a delicious, decadent Chocolate Mocha flavor with an emphasis on chocolate. The mocha notes are subtle.

Does Plexus Lean contain any allergens (Dairy, Egg, Peanut, Soy, Shellfish, Tree-Nut, Fish, and Wheat)?

No.

Is Plexus Lean Gluten free, 100% vegetarian and Non-GMO?

Yes.

Is Plexus Lean vegan?

No. Plexus Lean contains cholecalciferol (vitamin D3) which is derived from a sheep's wool by purifying Lanolin. Lanolin goes through many processes to purify it before being added to the product. Vitamin D3 is vital to the body to help absorb calcium and promote bone growth.

Is there caffeine or any other stimulants in Plexus Lean?

No.

What is used to sweeten Plexus Lean?

Plexus Lean is free from artificial sweeteners. We use organic, sustainably grown coconut sugar, stevia (*Stevia rebaubiana*) leaf extract, and natural flavors to create a delicious chocolate mocha blend.

Can I take Plexus Lean with other Plexus products?

Absolutely! Lean is a great addition to any Plexus regimen. We highly recommend using it with our TriPlex combo. The effects of this combination are very beneficial to your overall health, and help you lose weight[^] while supporting muscle.

Ingredient Glossary

A Word About Proteins

Plexus Lean™ contains a blend of seven protein sources. Before describing the details of our protein blend, a brief primer on the world of proteins may be helpful in order to gain a better understanding.

Protein

In the simplest terms, proteins are biological molecules made of chains of amino acids. The body uses amino acids to produce its own proteins which act as structural components of muscle and other tissues. Proteins also participate in a wide range of essential processes that include enzyme function, cell growth, and cell signaling. Proteins can come from both animal and plant sources.

Protein Concentrate

A form of supplemental protein powder made from a specific source, which contains 70-80% protein content. Protein concentrates are the most popular protein supplements on the market.

Protein Isolate

A purified version of a protein concentrate powder that contains 90% or more protein.

Protein Quality and Scoring

Even if you know the difference between a concentrate and an isolate, it's important to understand that the quality of the protein you use can vary greatly from brand to brand. Protein quality will tell you how effectively protein from a given source is used by the body by rating its essential amino acid composition, digestibility, and bioavailability. There are currently four accepted metrics of protein quality: protein efficiency ratio (PER), biological value (BV), net protein utilization (NPU), and protein digestibility corrected amino acid score (PDCAAS).

Plexus® feels the PDCAAS score is the most transparent and accurate method of determining the total amount of protein available for your body to use. The PDCAAS score of the pea protein in Lean is a 93/100, which is a high rating. That means 93% of the pea protein in this product can be utilized by the body. We help to offset that other 7% by complementing pea protein with rice protein and other ancient grains.

Many protein products will list the total amount of protein in their product, not the amount that is available to your body for use. For example, there is actually about 25g of protein in Plexus Lean, but utilizing the PDCAAS scoring method, we know that only 20g of that protein is utilized by the body. So, we put 20g on the label so you know exactly how much protein you're getting. No tricks here!

Ingredient Glossary

Plexus® Protein Blend:

Pea (Isolate and concentrate):

Pea protein is a well digested and highly bioavailable plant based protein and is the primary source of protein in Plexus Lean™. Plexus Lean contains both isolate and concentrate sources. Pea protein has the added benefit of being a comprehensive plant based protein source that avoids the potential allergen concerns associated with more commonly used soy based protein sources. Pea protein is a “complete protein,” and has a high protein quality score of .93 (93% bioavailability) on the PDCAAS scale.

Rice (Isolate):

Rice protein complements pea protein to ensure an optimally balanced protein composition that is entirely plant based.

Sacha Inchi (Natural):

Sacha inchi, also known as the Inca peanut†, is the seed of a plant that grows in the Amazon rainforest.

Amaranth (Natural):

Amaranth is an ancient grain, and was a staple crop of the native people of South America. Commonly recognized by its distinct purple colour in some species, amaranth is rich in the essential amino acid lysine, which is not found in adequate amounts in other cereal grains like corn and wheat.

Quinoa (Natural):

Quinoa is an ancient grain in the same family of amaranth native to northwestern South America.

Buckwheat (Natural):

Buckwheat is an ancient grain native to southeast Asia and an important staple in regions with poor soil quality.

Millet (Natural):

Millet is an ancient grain and an important protein source in the semi-arid regions of Asia and Africa. Millet protein is rich in essential amino acids except lysine. When millet is complemented by buckwheat and amaranth proteins, which are rich sources of lysine, it rounds out the protein nutritional profile.

Chia (Natural):

Chia is an ancient grain native to central America. The protein found in chia seeds has all 9 essential amino acids and is considered a complete plant based protein source.

Vitamin and Mineral Blend:

Vitamin A (as beta carotene and retinyl palmitate):

Vitamin A is a fat-soluble vitamin involved in a range of functions in the body. We need vitamin A to contribute to the normal function of the immune system, to the maintenance of normal vision, and to aid in the maintenance of the health of the skin and membranes. Once inside the body. Our body only converts as much vitamin A from beta-carotene as it needs which means beta-carotene is considered a safe source of vitamin A.

Vitamin C (as ascorbic acid and ascorbyl palmitate):

Vitamin C is an essential water-soluble vitamin that promotes a wide range of functions in the human body including energy metabolism, antioxidant activity, and protects against the oxidative effects of free radicals.

Iron (as ferric pyrophosphate):

Iron is an essential mineral found in the body. Most of the body's iron is found in the hemoglobin of red blood cells where it responsible for transporting oxygen throughout the body. Iron is a factor in red blood cell formation.

Vitamin D3 (as cholecalciferol):

Vitamin D is a fat-soluble vitamin that has a variety of roles involving nearly every system of the body. The major function of vitamin D is to aid in the absorption of calcium and maintain normal blood levels of calcium and phosphorus. Vitamin D builds and maintains strong bones and teeth. There are several forms of vitamin D but the form primarily utilized by the human body is cholecalciferol (vitamin D3).

Vitamin E (as d-alpha tocopherol succinate):

Vitamin E is an essential nutrient with antioxidant properties. The vitamin E in Plexus Lean is derived from non-GMO sunflower oil.

Vitamin B1; Synonyms: Thiamine (as thiamine mononitrate):

Vitamin B1 plays a role in certain metabolic reactions and functions as a co-enzyme in energy production and carbohydrate metabolism.

Vitamin B2; Synonyms: Riboflavin (as riboflavin 5-phosphate sodium):

Vitamin B2 is a factor in energy metabolism and tissue formation.

Niacin; (as niacinamide):

Niacin aids in normal growth and development and is a factor in energy metabolism and tissue formation. Nicotinamide is a non-flushing form of vitamin B3.

Ingredient Glossary

Vitamin B6; Synonyms: Pyridoxine (as pyridoxal 5-phosphate and pyridoxine hydrochloride):

Vitamin B6 is a cofactor for enzymes that are involved in more than 100 reactions impacting the metabolism of protein, fats, and carbohydrates. It is also a factor in energy metabolism and tissue formation.

Folate, Vitamin B9 (as L-methylfolate):

Folic acid is the supplemental form of folate, and is important in the utilization of proteins (amino acids) and DNA synthesis. Folic acid also plays an important role in pregnancy. Typical dietary folate and folic acid must first be converted by our body to tetrahydrofolate (THF), and then finally into L-methylfolate (5-MTHF) before it can be used. By using 5-MTHF in Plexus Lean, we skip the conversion steps, making it easier for your body to utilize.

Vitamin B12; Synonyms: Methylcobalamin (as molybdenum glycinate):

Vitamin B12 aids in red blood cell formation and helps in energy metabolism. Methylcobalamin is a bioactive and bioavailable form, immediately ready to be used by our body, and is vegetarian friendly.

Biotin; Synonyms: Vitamin B7 (as d-biotin):

Biotin has an important role in metabolic function. It assists in metabolism of fatty acids and utilization of B vitamins. It also helps to stimulate energy producing steps during metabolism in the cells of the body.

Pantothenic Acid; Synonyms: Vitamin B5 (as D-calcium pantothenate)

Pantothenic acid has a role as a cofactor for enzymes involved in the metabolism of fats, carbohydrates and proteins, and helps to regulate the ability to cope with stress, due to its involvement in the synthesis of the neurotransmitter acetylcholine. It is also needed for the synthesis of cholesterol, vitamin D, and some hormones.

Calcium (as calcium citrate):

Calcium is the most abundant mineral in our body. It is essential for the development and maintenance of strong bones and teeth, where about 99% of the body's calcium is found. Calcium citrate is a highly absorbable form of calcium.

Magnesium (as magnesium hydroxide):

Magnesium is one of the most abundant minerals in the human body, with half of magnesium located in the bones and teeth. Our magnesium is from natural marine source, which also contains over 50 trace minerals from the Irish Sea.

Zinc (as zinc citrate):

Zinc is an essential trace mineral that acts as a cofactor in approximately 300 different enzyme reactions and as a part of a well-balanced diet, contributes to the maintenance of normal skin, and immune system function,

Selenium (as l-selenomethionine):

Selenium is a dietary antioxidant involved in the formation of a protein that defends against oxidative stress. L-selenomethionine consists of selenium chelated to the amino acid methionine and is biologically active in humans, providing a highly bioavailable form of selenium.

Copper (as copper citrate):

Copper is an essential trace mineral that contributes to the maintenance of normal connective tissue health. Copper citrate is a highly bioavailable form of copper.

Iodine (as potassium iodide):

Iodine is an essential mineral nutrient. Iodine is a factor in the normal function of the thyroid gland. Potassium iodide is a common form of iodine that readily dissolves and is well absorbed.

Manganese (as manganese citrate):

Manganese is an essential trace mineral that helps activate and synthesize important enzymes and nutrients that contribute to the formation and maintenance of bones. Manganese citrate is a highly bioavailable form of manganese.

Molybdenum (as molybdenum glycinate):

Molybdenum is an essential trace mineral that helps to maintain the body's ability to metabolize nutrients. Molybdenum glycinate is a highly absorbable form of molybdenum.

Ingredient Glossary

Sodium (as monosodium phosphate):

Sodium is an essential nutrient found in many foods. Our bodies need a small amount of sodium to be healthy,

Potassium (as dipotassium phosphate):

Potassium is an essential mineral important that can be a factor in the regulation of fluid balance.

Cocoa Powder (Natural):

Cocoa powder is the fermented and dried seed of the cocoa tree. Cocoa is a naturally rich source of antioxidants, particularly procyanidins and flavonoids. Cocoa is a natural source of flavor, contributing the distinct chocolate taste the plant is known for.

Coconut Palm Sugar (Organic):

Palm sugar is a natural sugar derived from the sap of the flower bud stem of the coconut palm. According to the Sydney University Glycemic Index Research Service, coconut sugar has a glycemic index of 54, qualifying it as a low glycemic sweetener. Coconut palm sugar imparts a distinct caramel flavor with its sweetness to naturally enhance flavor while helping to contribute to a balanced carbohydrate composition found in a complete meal.

Sunflower (*Helianthus annuus*) **Oil Powder:**

Sunflower oil is extracted from the seeds of the sunflower, and is a neutral tasting plant oil rich in healthful unsaturated fatty acids. Sunflower oil provides a healthy source of dietary fats necessary to round out the balanced nutritional composition of a complete meal.

Natural Flavors:

Natural flavors are naturally occurring compounds that contribute to the unique flavor profiles found in foods. These various flavors are taken from essential oils, resins, essences, or extracts. Plexus Lean's natural flavors are uniquely blended to give a rich mocha flavor to complement the natural flavors already present in the Plexus Pea Protein Blend.

Leucine

Leucine is a branched chain essential amino acid. The leucine content of a protein is the key indicator of that proteins' ability to stimulate muscle protein synthesis. Proteins high in leucine are better equipped to help support muscle. Plexus Lean™ complements our pea protein blend with additional leucine for muscle support.

Flax (*Linum usitatissimum*) **Seed Powder:**

Flax seeds are an abundant source plant based omega-3 fatty acids and help to augment the healthy lipid profile in Plexus Lean.

Sunflower Lecithin:

Lecithins are naturally occurring plant fats used to help ensure an even, balanced, smooth texture, and to help all the healthful ingredients in Plexus Lean to dissolve and blend well.

Guar Gum:

Guar gum is a naturally occurring polysaccharide derived from guar beans that is a soluble fiber. Due to its attraction to water, it is used in small quantities to both thicken and improve the texture of liquids.

Prebiotic Blend:

Prebiotics promote the growth of beneficial bacteria, both those that are already established in the colon, as well as those externally administered as probiotic bacteria. Prebiotics are parts of food which are indigestible in the upper gastrointestinal tract and reach the colon, helping to selectively promote the growth and/or activity of certain bacteria in the colon that provide general wellbeing.

Short-chain fructo-oligosaccharides (Naturally derived):

Short-chain fructo-oligosaccharides (scFOS) occur naturally in several plants such as asparagus, wheat, Jerusalem artichokes, and rye.

Alpha-galactooligosaccharides (Naturally derived):

Galacto-oligosaccharides (GOS) are created by enzymes found in bacteria and fungi using lactose, but the a-GOS source in Plexus Lean is plant based. Prebiotic GOS are indigestible but can be utilized by resident gut microbes and may beneficially affect beneficial bacteria in the gut.

Xylooligosaccharides (Naturally derived):

Xylo-oligosaccharides (XOS) are naturally present in fruits, vegetables, and bamboo. Prebiotic XOS are indigestible but can be utilized by resident gut microbes and may beneficially affect beneficial bacteria in the gut.

Ingredient Glossary

Protease Enzyme Blend:

From *Bacillus subtilis*:

This microbe is naturally found in soil and vegetation and secretes a variety of enzymes used to break down plant material.

From *Ananas comosus*:

More commonly known as pineapple, *Ananas comosus* produces a potent protease known as bromelain, added to aid in the digestion and bioavailability of the plant based proteins in Plexus Lean.

Stevia (*Stevia rebaudiana*) Leaf Extract:

Stevia is a perennial native to South America that has been used for centuries as a medicinal herb and a natural sweetener. The extract is prepared from the sweet-tasting leaves, and is standardized to 99% Rebaudioside A, the sweetest molecular compound in *stevia*. The extract is then purified by filtration and crystallized into a powder that is typically 200 times sweeter than table sugar, and has zero calories. Plexus® uses a 100% pure, Non-GMO *Stevia rebaudiana*.

Xanthan Gum:

Xanthan gum is a naturally occurring polysaccharide made from the fermentation of sugars. Small quantities help to stabilize solutions that are mixtures of water-soluble and fat-soluble ingredients to ensure an even consistency.

Medium Chain Triglyceride Oil Powder:

Medium chain triglycerides naturally occur in coconut oil. These shorter chain fats aid with the blending of other lipids like the flax seed and sunflower oil found in Plexus Lean™.
